SUMMARY OF PROCEEDINGS

CLANDESTINE SERVICES TRAINING OFFICERS MEETING

24 March 1955

1. Chairman, Clandestine Services Training Committee (C/CSTC), reported that NEA Division will have requirements for [redacted] at the rate of approximately [redacted]
2. C/CSTC reported on the status of requirements for [redacted] External Training. The Office of Training (OTR) will receive a formal statement of requirements for Clandestine Methods and Techniques and Clandestine Operations as projected for the remainder of 1955 through February of 1956.
3. C/CSTC indicated that a need for Programs of Instruction (POI's) existed in order to provide a basis for training of U.S. staff agent personnel overseas. OTR replied that the development of POI's would receive priority after the completion of Lesson Plans for existing courses of instruction. OTR further pointed out that POI's were so sketchy, being merely outlines of courses, that their use for the above purpose would not be as great as the Lesson Plans themselves. Once the Lesson Plans have been completed, case officers in the field could develop POI's from them to meet their particular requirements.
4. At the request of OTR, the WE Division Training Officer explained the graphic system he had developed and put into effect within WE for indicating the extent of training provided and projected for each individual of the division. This system in its present stage of development is confined solely to training for clandestine activities. It is contemplated that the system will be expanded to cover language and area training as well. By means of this system the division is able to estimate its future requirements for basic, intermediate, and advanced training programs and to accomplish rapid surveys of the current state of training of all its on-duty personnel.

As a result of this presentation, it was concluded that the Office of Training planning effort would be materially benefited by access to the results of similar systems for all DD/P divisions. C/CSTC agreed to sponsor the development of such systems within DD/P for this purpose.
